THE BLOOMFIELD CITIZEN

A WEEKLY JOURNAL
OF
LOCAL NEWS AND HOME READING,
PUBLISHED AT
BLOOMFIELD, ESSEX CO., NEW JERSEY,
BY THE
Bloomfield Publishing Company.

$2.00 a Year, in advance. Single Copies, 5c.

THE EDITORIAL AND NEWS DEPARTMENTS ARE UNDER THE SUPERVISION OF A BOARD OF DIRECTORS, BY WHOM THE EDITORS ARE SELECTED AND THE BUSINESS OF THE NEWSPAPER CONTROLLED.

SUBSCRIPTIONS, ADVERTISEMENTS AND COMMUNICATIONS OF ANY KIND, SHOULD BE ADDRESSED TO "THE BLOOMFIELD CITIZEN, P. O. BOX 240, BLOOMFIELD, NEW JERSEY." OUR OFFICE IS OVER THE POST OFFICE.

ALL COMMUNICATIONS SHOULD BE ACCOMPANIED BY THE AUTHOR'S NAME, IN CONFIDENCE, OR FOR PUBLICATION. REJECTED OR UNAVAILABLE ARTICLES, HAVING PROPER STAMP AND ADDRESS, WILL BE RETURNED.

WHILE IT IS THE FULL INTENTION OF THE EDITORS TO ALLOW THE LARGEST LIBERTY TO CONTRIBUTORS, IT MUST BE DISTINCTLY UNDERSTOOD THAT WE DO NOT THEREBY ENDORSE THEIR OPINIONS, OR ARE IN ANY SENSE RESPONSIBLE FOR THEM.

NEWS ITEMS, NOTICES AND REPORTS MUST BE SENT TO THE OFFICE NOT LATER THAN THURSDAY EVENING OF EACH WEEK, IF THEY ARE TO APPEAR IN THE CURRENT NUMBER.

TRANSIENT NOTICES, FIFTY CENTS FOR EIGHT LINES, EACH INSERTION. FOR LARGER SPACE AND PERMANENT RATES, APPLY AS ABOVE.

East Orange Sewage.

The Township of East Orange desires to get rid of its sewage. This is natural.

But East Orange is not a place where the people desire and sit, still. They bestir themselves to realize their wishes, and as a result they have a plan well under way for the disposal of their sewage. So far so good.

The people of Bloomfield appreciate, admire and commend the vigor and public spirit of their neighbors over the line. But they object to the use of a part of their territory as a dumping ground. This is also natural, as our neighbors will admit.

The mass of the citizens who own property or regard their convenience, look upon this new enterprise with uneasiness; and all who know anything of it regard it with dismay. The plain English of the matter is, that the contents of all the cesspools of East Orange, partially purified, is to be deposited in a lot of land in the Township of Bloomfield, near the works to be established at Dodd's saw mill, and run off through Second River. To be sure we might imitate Newark, and use the flow of Second River as a water supply, and thus avoid all danger of its impurities rotting in the sun to the damage of the air. But drinking sewer water is no less dangerous (outside of Newark and Jersey City) than breathing sewer air. Of what avail will it be to avoid the perils of sewer gas by means of elaborate plumbing within doors, if we are to be confronted with the same sort of peril without?

There are places accessible to East Orange where the houses are few, and will be for many years to come, where these works could be located. There are other systems which do not involve purifying sewage in ones own back yard. It is therefore needless to inflict this nuisance upon a large and valuable and thickly settled part of Bloomfield, Orange and East Orange. To bring the matter to the attention of the East Orange Town Committee, it is proposed to present a petition to them remonstrating against the using of the proposed site for a sewage works. Copies of this petition will be left at several convenient points and it is hoped that every person in the township will make it convenient to call and sign.

Notice of these places will be found on the first page.

The Sewage Question.

From an article in *Nature* (London) the following points are taken:

The purification and utilization of the sewage of towns is a subject of much importance, both in its public health and commercial aspects. The idea, so long entertained, that town sewage could, by various methods, be made to yield a manure which would give rise by its sale to an enormous profit is now exploded. The highest degree of purification, we now know, can only be attained on land naturally suitable from its porosity and other properties, and artificially prepared by extensive under-drainage. The agents which purify sewage in its passage through soil, by converting the nitrogenized organic matters into inorganic salts—nitrates and nitrites of the alkaline and earthy bases, and ammonia—have been discovered to be bacterial micro-organisms, resident chiefly in the superficial 18 inches of soil, and far more abundant in some soils than in others. Sewage farming has been ascertained to be profitable, under suitable conditions. The sewage must flow from the town to the farm by gravitation—the cost of pumping will neutralize profits from the sale of farm produce; a part of the farm must be laid out as a filter bed, so that the sewage, when not required on the cultivated land, or when so dilute from the presence of storm waters as to be inapplicable, may be purified on a small, very porous, area by the process of intermittent downward filtration. Very few growing crops are benefited by the application of sewage, except the various kinds of grasses, and of these such enormous quantities can be produced that, unless converted into "silage," or utilized on the farm in the production of stock and dairy produce, they may be expected to result in a loss, from the absence of any demand for such large quantities at all periods of the year.

In this country, the sewage farm at Birmingham is probably the best example of what has been done to solve a most difficult problem by the application of sewage to land. Here, the sewage is first freed from its suspended matters by a process of precipitation, a proceeding necessary not only to prevent warping of the land with offensive solid matters, but also to withdraw the metallic salts and acids incidental to the sewage of a manufacturing town, which would be injurious to vegetation. Even this magnificent example of dealing satisfactorily with the most difficult municipal problem of modern times is eclipsed by the city of Berlin on the continent. The sewage farms at Berlin have successfully dealt with the sewage of 887,500 people—nearly twice the population of Birmingham, whilst London is still allowing to run to waste an enormous amount of valuable material, at the same time polluting a river—the highway of its commerce—to an extent never previously dreamt of.

Processes of precipitating sewage by chemicals are now known to exert only a partially purifying influence. The best process yet discovered can do little more than free the sewage from its suspended matters, allowing all the dissolved constitutents of sewage—by far the most valuable portion agriculturally and chemically—to pass away in the effluent. Lime dissolved as lime water, sulphate of alumina, and perhaps proto-sulphate of iron, taken together and added to the sewage in the proportion of not more than 10 to 15 grains to the gallon, are the best, most economical, and most effective precipitants. Other more valuable substances, added to the sewage with the view of increasing the value of the precipitated sludge or manure, are in large proportion lost in the effluent water, and as they do not assist precipitation, might just as well be added to the sludge afterwards, if fortification is required. Half a crown and no more is the value per ton of the precipitated solids of sewage. This value will generally pay for the cost of their carriage a mile or so in agricultural districts, but no further.

A great improvement in dealing with the semi-liquid sewage sludge has been lately effected. The sludge containing over 90 per cent. of water was formerly allowed to dry in the air or in a drying-chamber, and a most intolerable nuisance resulted. It is now possible by means of of hydraulic filter-presses to convert the semi-liquid sludge into solid cakes containing 40 to 50 per cent. of water, and in this form it is innocuous to the senses, and can be readily conveyed away by cartage.

The knowledge already acquired demands that now, and in the future, the sewage of towns should, whenever possible, be utilized on land in the production of crops or dairy produce; failing this, the sewage should be freed from its solids by precipitation, and subsequently purified on land laid out as filter-beds, efficient purification, and not the production of crops, being alone aimed at. If application to land is impossible, then precipitation processes alone must be relied on, and where the sewage can be turned into the sea, and effectually got rid of without nuisance, there it may be allowable to waste valuable matter which cannot be utilized except at a cost destructive of all profits from its utilization.

State Items.

One hundred of the more tractable patients of the Morris Plains Asylum were taken to see Doris' circus, at Morristown.

W. W. Whiting, of Vineland, marketed this season 18,000 quarts of blackberries, netting him from four to five cents per quart.

The Rahway Reform Club has asked George P. Edgar to resign, for opposing the Prohibition political movement. Several of the officers have also resigned.

Dr. E. M. Hunt, of the State Health Board, says arrangements are being made by which the General Government will assist the State financially in suppressing pleuro-pneumonia among live stock in New Jersey.

The expense account of the late steward of the New Brunswick Poor Farm shows such entries as six-dollar button gaiters for the paupers, white shirts by the dozen, fine linen, warm blankets, crates of oranges, bottles of hair oil, $20 and $30 suits of clothing, silk dresses, three kinds of sugar, corsets, etc.

William Shanahan, of Jersey City, a fireman in Lorillard's tobacco factory, was oiling the machinery, Thursday, when John Armstrong, the engineer, started the engine, not knowing where Shanahan was. A heavy iron rod struck Shanahan in the back of the neck and broke it, killing him instantly.

Blanchard Hall, a young man of Millville, and well-known in Vineland, was married a recent Saturday to a Millville young lady, and the couple started on a wedding trip at once. On their homeward bound trip, Hall, on some pretence, left the car in which they were seated, when somewhere near Clayton, and since then his wife, it is said, has not seen him. Some one started the story that he had been foully dealt with, but that idea has been exploded. The foul dealing, it appears from report, has been on his part. It is also reported that his wife has heard from him through the medium of a telegram requesting that his clothes be sent him.

A serious and perhaps fatal shooting affray is reported to have occurred at Union Hill last Saturday. The victim is Miss Dora Rodenberg, seventeen years old, employed at Givernand & Co.'s silk factory. While on her way to work with several of her companions, she entered Jacob Lambers's apple orchard, which is near the road, and helped herself to the fruit lying on the ground. Farmer Lambers, who has been repeatedly annoyed by the factory girls stealing the apples, appeared with a double barreled shot-gun. As soon as they saw the farmer with the gun they fled, but stopped at the fence to gather a few more apples. This so angered Lambers that he raised his gun to his shoulder and fired. The gun was heavily charged with buckshot. The shot struck Miss Rodenberg full in the face, and Dr. Schlem, who attended her, fears that some of it may have penetrated the brain. Miss Rodenberg was carried home by her companions, and farmer Lambers, after the shooting, shouldered his musket and returned home.

A wedding occurred at Manasquan, on Wednesday evening, which has given rise to much gossip in Camden, where the parties dwell. Washington Perks, a young man who not long since attained his majority, who resides at No. 535 Arch street, Camden, was married to his stepmother. The affair was witnessed by a number of the field and staff officers of the Sixth Regiment, of Camden, now encamped at Sea Girt. Young Perks' father, Richard, was quite a prominent citizen of Camden during his life. He made considerable money in manufacturing tassels, and was elected Councilman at large on the Republican ticket about seven years ago. At that time he resided at the southeast corner of Fifth and Stevens streets. Shortly after the death of his first wife he married a domestic employed in the family, which gave great offence to his daughters, who were prominent members of Camden's best society. The daughters left the parental home, the father has died and now his son has married the widow. He is a Philadelphia furniture manufacturer. Both are twenty-six years old. Mrs. Perks is decidedly pretty. She was left $40,000 by the father, and so was the son.

At Keyport, Monmouth County, George W. Strickland was tried by a jury of six for saying "D——you" to Samuel G. Fairchild in a wrangle between the two men. The jury under the "blue laws" fined Strickland 50 cents and $4.10 costs.

Dissolution of Partnership.

Notice is hereby given that the partnership lately subsisting between Edgar D. Ackerman and Franklin P. Campbell, of Bloomfield, Essex County, New Jersey, under the firm name of Ackerman & Campbell, was dissolved on the third day of September, 1886 by mutual consent. All debts owing to the said partnership are to be received by the said Edgar D. Ackerman and all demands against the firm are to be presented to him for payment.

FRANKLIN P. CAMPBELL.
EDGAR D. ACKERMAN.
Bloomfield, Sept 3d, '86.

The business of plumbing and gas fitting heretofore carried on by the above firm will be continued by the said Edgar D. Ackerman, at the old stand in Bloomfield.

Those Elegant Fans
It gives us the greatest satisfaction to be able to announce to our many thousand customers the fact that, owing to the lateness of the season, we have been fortunate in securing our one hundred thousand of these BEAUTIFUL
LARGE FANS,
At a very small cost, thus enabling us to give one of them to each purchaser of ½ lb of Tea or Baking Powder or 1 lb of Coffee, the check being retained by the purchaser. Thus making this heretofore costly article entirely a free gift, whereas we have been for the last two weeks charging 1 lb check each. The free distribution of the Fans will commence SATURDAY, Sept. 4. Our customers may consider themselves very fortunate in this turn of affairs, as the Fan would find ready sale anywhere at 25c per copy.

Butter. Butter.
The wise acres who have been buying OLEOMARGARINE under the name of BUTTER have just realized that they have been duped now that the former has virtually dropped out of the market, and very bad Butter is being sold at the same prices. To all such we would say,
COME TO US.
We will sell you a good artical at a very reasonable price, and no deception will be practiced upon you. Our record is clear. No man dare say to the contrary.
